To: Selection Committee
Computer Science Department
Faculty of Sciences

SUBJECT: APPLICATION FOR FULL-TIME RESEARCH AND TEACHING ASSISTANT POSITION (REFERENCE: 2026-S131)

Dear Members of the Selection Committee,

I am writing to apply for the Research and Teaching Assistant position in Computer Science (Reference: 2026-S131) at the Faculty of Sciences. I am strongly motivated to pursue a PhD in Computer Science, and I consider this position an excellent opportunity to engage in high-quality research while contributing meaningfully to teaching within an internationally oriented academic environment.

I hold a Master of Science in Computer Science (Artificial Intelligence) and a Bachelor of Science in Physics with Information Technology. My academic training has equipped me with strong analytical and mathematical foundations, as well as solid expertise in software development, machine learning, and computational problem-solving. Over the course of my studies, I have developed a particular research interest in artificial intelligence, data-driven systems, and applied computational methods.

I am especially attracted to this position because of its strong research focus combined with structured teaching responsibilities. The opportunity to conduct doctoral research under academic supervision within the Department of Computer Science aligns closely with my long-term goal of contributing to scientific advancements in artificial intelligence and computational systems. I have already identified research areas within computer science that align with ongoing developments in the field, and I am motivated to further refine my PhD research direction in collaboration with a supervising professor within the department.

In addition to research, I am fully prepared to contribute to the teaching mission of the department. I have strong pedagogical motivation and I am confident in my ability to support practical sessions and exercise classes in computer science and related subjects such as bioinformatics. I view teaching not only as a responsibility but also as a valuable opportunity to strengthen student understanding while improving my own communication and academic leadership skills.

I meet the required competencies outlined in the position description, including strong scientific skills in computer science, good interpersonal abilities for teamwork, and a strong sense of responsibility in executing academic and logistical duties. I am highly proficient in English and

actively working to improve my French to ensure effective integration into the teaching environment and academic community.

I am particularly motivated by the department's international research environment and its emphasis on both theoretical and applied computer science. I am fully committed to contributing actively to the research group while progressing toward the successful completion of a PhD.

Thank you for considering my application. I would welcome the opportunity to further discuss my candidacy and research interests with the department.

Yours sincerely,
Elisha Kidenge
